## Summary:

Staff Frontend Engineer (**8+ yrs**) who scales web platforms that directly move revenue, performance, and engineering velocity. **Design systems owner driving 85%+ cross-team adoption, eliminating 90% of visual defects, and 4× faster UI delivery loops.** Hands-on technical leader and engineering communicator aligning frontend architecture to measurable business impact.

## Core Technical Skills:

**Frontend Architecture:** Next.js, React, TypeScript, Microfrontends, SSR/SSG

**Systems Design:** Design Systems, UI Platforms, Cross-team Architecture, Monorepos

**Performance:** Lighthouse, bundle optimization, runtime efficiency, Web Vitals optimization (LCP, CLS, INP)

**Leadership:** Technical strategy, alignment across squads, mentorship, and engineering culture

**DX & Tooling:** Storybook, CI/CD, Playwright, design system governance

**Platform/Backend Fluency:** Node.js, NestJS, PostgreSQL, AWS, Kubernetes

## Professional Experience:

### Zapp Technology — Lead Frontend Engineer - Sydney, Australia (Remote Contract) | Jun 2025 – Dec 2025

Technical lead owning architecture, frontend foundations, and early product direction.

- Architected the initial Next.js frontend platform, API contract layer, and customer dashboard for MVP launch.
- Built TypeScript/Next.js/Fastify/Prisma MVP, reducing validation cycles by **14 days to 3 days (4× faster)** and enabling on-schedule launch.
- Delivered end-to-end Stripe integration with typed API contracts, fallback states, and secure checkout flows (**100% MVP payment processing**).
- Introduced component RFCs + prototype benchmarking, cutting decision latency **40%+** and collaboration friction **35%+**.

### Gen Digital — Technical Lead Frontend Engineer (Fintech) - New York, USA (Remote) | Dec 2022 – May 2025

Directed frontend architecture across multiple squads for the Moneylion marketplace division.

- Led consolidation of **6+ apps → 1 unified Next.js platform in 12 months**, removing **30–45% duplicated business logic**.
- Optimized JS execution **35–40%**, improving **LCP 3.8s to 1.9s (50%↓)** and **CLS 0.28 to 0.05 (82%↓)**.
- Built and scaled **MLDS Design System (120+ components)**, achieving **85%+ adoption (10+ teams, 6 months)**, reducing UI defects down by **90%**, and accelerating delivery cycles up to **40% faster**.
- Rebuilt CI/CD (GitHub Actions, Docker, Kubernetes, Turborepo), reducing **CI build time 18m to 6m (66%)** and **deploying execution 12m to 4.5m (62%)** with **99.8% success rate**.
- Implemented deployment safeguards and E2E checkout coverage, improving marketplace success **22% to 95%**, generating **USD 8M+ incremental quarterly revenue**.

- Built and managed a frontend chapter (**13 engineers**), formalized career leveling, drove **3× YoY promotions**, and maintained **98% retention**.

### **Socar Mobility/Trevo — Lead Frontend Engineer — Kuala Lumpur (Remote) | Feb 2021 – Nov 2022**

Chapter Lead overseeing UI architecture, engineering standards, mentorship, and cross-team technical maturity.

- Designed **Micro-Frontend UI Platform**, enabling independent deployments and increasing release frequency **1/week to 3+/week** with **0 rollback volatility increase**.
- Built insurance checkout funnel + premium calculator (React + frontend-owned NestJS/Prisma APIs) generating **1.2M USD/quarter**, reducing error states by **31%**, and lifting conversions up to **27%**.
- Re-worked internal dashboards + Trevo Design System (TDS), reducing analytics time by **60%** and UI cycle latency **45%**.
- Owned hiring + onboarding, accelerating ramp-up **90 days to 21 days (4.2× faster)**.
- Spearheaded Indonesia launch-critical UI foundations, contributing **3.2M USD(2022 revenue)** and improving flow completion **30%+**.

### **The Access Group – Full Stack Software Engineer - Manchester, UK (Remote) | Dec 2017 – Jan 2021**

- Delivered **70+ client SaaS recruitment sites** on a shared React platform, sustaining **99.9% uptime** and generating **€100K+ quarterly revenue**.
- Built **Volcanic Internal Design System (90+ components)**, reducing UI inconsistencies **88%↓** and dashboard delivery cycles **50% faster**.
- Engineered AWS Lambda + Node.js auth microservices, reducing auth latency **41%↓** while maintaining **zero service downtime**.
- Owned infra-integrated frontend deploy workflows, shipping **15–20 releases/month with 0 downtime SLAs**.
